

The Royal Institution
Science Lives Here

Interactive science shows brought to your school

“The Royal Institution had an amazing impact on the status and standards of the teaching and learning in our school and community.”

Bring science to your school

The Royal Institution (Ri) is a charity dedicated to connecting people with the world of science. We've been communicating science to the public for over 200 years from our home in London, and are now bringing that expertise through entertaining shows into schools across the UK.

The shows

We have a choice of two shows that can be tailored to suit either primary age students, or 11–14 year olds.

Feel the power

Witness the earliest experiments that revealed how electricity could be harnessed in a show rooted in the Ri's history of discoveries relating to magnetism and electricity. This show tells the story of electricity with live demonstrations, audience interaction and content ranging from explanations of static electricity to modern day use of generators.

KS1, KS2, KS3 PRIMARY 2-7, S1-3

Explosive food

Learn about food and its often explosive nature. Find out about the incredible amount of energy contained in the food that goes in your mouth in this show packed with exciting chemistry and physics demonstrations.

KS1, KS2, KS3 PRIMARY 2-7, S1-3

Included in your booking...

'Bringing science to life' A show for your local community

A fun, interactive science show for your local community. This is a great way to show that your school emphasises and celebrates science. You can offer it free to the community or as a ticketed event to help fundraise for the school. This will be delivered on the same day as our visit, in the early evening.

Continuing Professional Development (CPD) sessions

We've condensed our knowledge from decades of performing shows and demonstrations to craft sessions that will inspire and empower teachers. For primary teachers, we build confidence for teachers less familiar with science and show them how easy it is to do simple and fun science activities with their classes. For secondary teachers, we give practical tips and show you how to use simple demonstrations and experiments to great effect in your teaching.

Information

The Royal Institution is an independent charity dedicated to connecting people with the world of science. We are the home of the famous CHRISTMAS LECTURES, science shows for young people shown on TV every Christmas. Our Science in Schools programme is the culmination of two centuries of experience and experimentation, bringing our popular demonstration shows into schools across the UK. Our presenters also provide teacher development sessions to help you make the most of science in your school.

Price

1 show, 1 CPD session and 1 community show £650 + VAT

Add a second performance of your chosen show for an extra £100.

Duration

The shows all last for an hour without an interval. The CPD session also lasts an hour, and is usually delivered immediately after school.

Booking

Please email schools@ri.ac.uk or phone **020 7670 2904** Mon–Fri.
