Demonstration Risk Assessment Form

SCIENCE IN SCHOOLS- EXPLOSIVE FOOD SHOW
FEBRUARY 2021- COVID MEASURES

Please note this document is to be read alongside The Full Risk Assessment for the Explosive Food Show

The follow demonstrations from that stated document will need adaptions:
1. Cinnamon Taste Test
2. PTC Test
3. Digestive System
4. Mentos and Coke

Action Rating

10 and above  The work is too dangerous and should not be undertaken
8 or 9        The work is high risk. Those undertaking the work must be fully competent and experienced for the type of work, equipment to be used and fully understand all risks present.
5 or 6        Moderate risk. Workers must be fully competent for the type of work and risks present, or under competent supervision.
4             Low risk. Those undertaking the work must be aware or be made aware of the risks and mitigation measures required.
2 or 3        Slight risk. Those undertaking the work should be aware or be made aware of the risks and mitigation measures required.
1             Insignificant risk. Activity suitable for all workers

ACTIONS NEEDED BY VENUE:
1. Isolate Smoke/ Fire Alarms in vicinity of demonstrations
2. Ensure 1 x Fire Extinguisher is on Stand-by (only to be used in emergencies- should be either dry powder, carbon dioxide or water spray (not jet))
3. Ensure presenter knows Fire Evacuations procedures
4. Ensure presenter knows location of nearest fire extinguishers
5. To inform presenter/ Ri (at least 24hr prior to performance time) if any of the attendees suffer allergies to latex, eggs, tomatoes or has a heart condition.

Risk assessed by: Fran Scott

<td>COVID Infection</td>
<td>It is of prime importance that we protect both your school and our presenters from potential COVID infection. Firstly our presenters will wear masks whilst moving throughout the school building. They will take them off to perform. The presenters will strictly follow the latest guidelines in place at the time. And any addition rules followed within your school building. We will provide the presenter with gloves, virus-grade sanitiser and a mask. If they experience any of symptoms of COVID-19 they will not enter the school building.</td>

**Method Statement**

**Hazards**

Volunteers are asked to pinch nose and place a small amount of cinnamon in their mouths. They are then instructed to release their noses. Once they release their noses they will be able to taste the cinnamon much more.

**Mitigation**

The cinnamon will be dispensed into single cups for each of the volunteers to use. These will be on a table away from where the presenter is standing such that the volunteers can come onto stage sanitise their hands, then take a cup. When setting up the cup with the cinnamon, the presenter will wear a mask and gloves.

<td>Six or more volunteers are selected from the audience and asked to place two differing strips of paper on their tongues, one at a time. One strip is simply a control (a plain strip of cinnamon) and the other will be a strip with PTC. The on-stage volunteers are then handed something to put in their mouth by the presenter and associated potential contamination. The strips (in a similar way to the cinnamon) will be dispensed into single cups for each of the volunteers to use. These will be on a table away from where the presenter is standing such that the volunteers can come onto stage sanitise their hands, then take a cup.</td>

</table>
The other strip is one that is impregnated with PTC (Phenylthiocarbamide).

Both strips can be seen here:
https://www.brecklandsscientific.co.uk/HHE-250-100-p/hhe-250-100.htm

When setting up the cup with the strips in, the presenter will wear a mask and gloves. Alternatively, envelopes can be used to store single strips.

Current Risk
Various foods are cut up with scissors into a bowl and mixed with coffee. They are then mashed together. First liquid and soap are added. This is transferred to a plastic bag where vinegar and food colour are added. This is then transferred to tights which are squeezed to remove liquid. The final result is squeezed into another bowl.

On-stage volunteers touching same props as presenter

There will be no on-stage volunteers used in this demonstration. Instead the presenter will perform all the tasks usually done by volunteers such as:
- Wearing of the digestive system diagram/ t-shirt/ apron
- Cutting up and mashing the food
- Place the food into the bag
- Stretching out the small intestine
